

Thank you very much for choosing A-MP016 MP3 player.

1 Construction

1. Hoop for hanging cable
2. Earphone jack
3. Power on-off/ Pause/ Play
4. LED indicator light
5. Skip next button/Volume+
6. Skip previous button/Volume-
7. USB flash memory drive port

2 Installation

No driver needed for Windows 2000/ME/XP, just plug the MP3 player in the USB port of PC.

3 Power

Power is supplied by one AAA size battery. Open the battery cover, put the battery into the slot, adjust it as per icon (+, -) in picture. Unit will give out high pitch warning signal when battery power is low.

4

Download music to MP3 player

Insert USB Controller module in an USB adapter in PC.

Double click "My Computer" icon, check and make sure the USB flash drive is in normal working condition. Select music files from the PC, perform "copy and paste" or "drag and pull" functions to store music in Controller module.

NOTE: Do not plug / unplug earphone when transferring data to / from USB flash memory drive, or data transfer will fail and PC system may freeze.

5

Function

Earphone:

- ◆ Never insert the earphone when transferring files. Insert earphone only in MP3 operating mode.

MP3 Player:

- ◆ USB flash drive mode (LED in Green):
 1. Insert module into an USB port on PC, green light will come on.
 2. If there is no data transfer for 6 seconds, the LED will be off.
 3. The LED light will blink during data transfer (copy, move, delete, format).
- ◆ MP3 play mode (LED in Red):
 1. When press "play" button, red light will blink.
 2. When press "pause" button, red light will be on.
