

Panel Mount

PCB Mounts

SERIES T33

### Miniature Hour Meters with Low Power Consumption

Series T33 miniature hour meters are quartz crystal oscillator controlled impulse counters. They are ideal for battery operations and use on electronic PC Boards; applications where space is limited.

- Quartz accuracy
- Shock resistant/High reliability
- Low power consumption
- Enhanced readability
- Easy installation
- Waterproof versions available

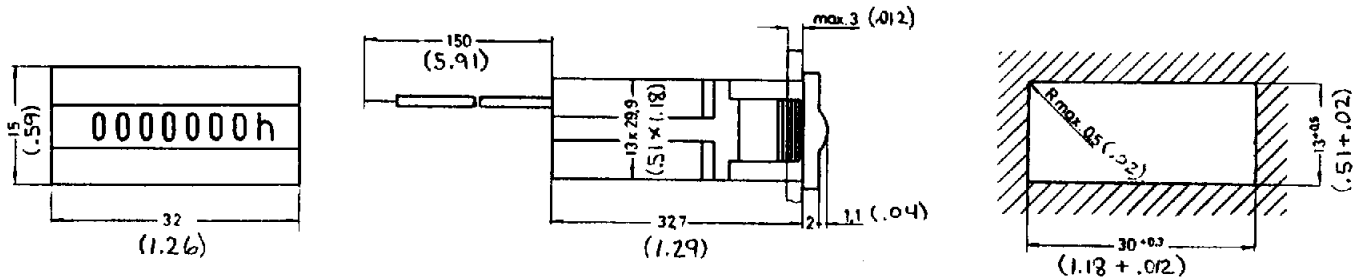

#### TECHNICAL FEATURES:

Display:	99999.99
Figures:	white on black (hours) red on black (decimals)
Figure Size:	.118" high x .039" wide .158" high with magnifying window
Voltage:	5, 12, 24 VDC $\pm$ 10% 12-28 VDC (optional)
Average Power Consumption:	10 mW (5 VDC) 24 mW (12 VDC) 48 mW (24 VDC)
Operating Temperature Range:	-10°C to 50°C (optional -30°C to 70°C)
Mounting:	Panel and PCB mount (other variations available)
Termination:	Leads or pins
Weight:	.7 oz.
