

18153-SW

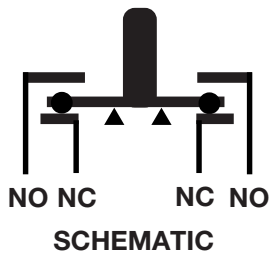

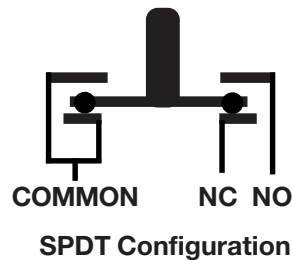

Rocker action foot switch for industrial use.
Momentary in either direction, spring return to center OFF.
Contacts: DPDT Mom-Off-Mom each side
380VAC/220DC @ 5A
Actuation pressure: Approx. 2.5lbs. either side
Cord Not Included

EACH FOOT SWITCH CONTAINS 4 SWITCH MODULES; 2 FOR EACH ROCKER POSITION

To configure & to add cord, Remove 2 screws on sides to remove treadle.
Remove 2 bracket screws to remove switches.
Remove 2 screws holding switches to bracket to access Switch Terminals.
Configure switches & attach cord(s).
Reassemble unit

Each switch module contains a SPST-NO and a SPST-NC. To Configure as a SPDT switch you must jumper a NC terminal to a NO terminal to create a "Common"

To Configure as a DPDT switch you would configure both Modules as above
